

COVID-19 Response Guide

The purpose of this guide is to help decision making and eliminate any uncertainty as to what action the school requires and parents should do when faced with the varied and different situations that can occur related to COVID-19.

The school's priority is to keep the school staff and students safe and healthy. As instructed by the Ministry of Education (MoE), the school will not share any details of cases or personal information of families. The Ministry of Health (MoH) will determine all requirements for quarantine and testing.
